## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

((a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 30 –33 are rejected under 35 U.S.C. 102(a and e) as being clearly anticipated by Ravichandran et al, US Patent No. 5, 977,219.

3. The rejection is repeated for reasons of record. The compounds of Ravichandran et al overlap with applicant's claimed compounds. For example, applicant requires that at least one of E<sub>1</sub>, E<sub>2</sub> and E<sub>2</sub>' be (CH<sub>2</sub>)<sub>m</sub>-CO-X-T<sub>1</sub>. Such a moiety as this is included on the benzotriazoles of Ravichandran et al. The remainder of the basic benzotriazole structure is clearly known in the art as is taught by patentee. See col. 2, line 25 through col. 12, line 62. No patentable difference is readily ascertained between present and patented inventions.

4. Applicant's arguments filed 6/17/05 have been fully considered but they are not persuasive. Applicant has amended the claims to eliminate certain definitions for substituent T<sub>1</sub> that applicant finds to overlap with the compounds of Ravichandran. However, this amendment is not sufficient to overcome the prior art teachings and all compounds encompassed therein.

Art Unit: 1714

Other species disclosed by Ravichandran et al correspond to those of applicant's claims. For example, applicant's bis-benzotriazole structure of formula (II) wherein  $E_2$  is  $(CH_2)_m - CO-X-T_1$  corresponds to the bis-benzotriazole structure of Ravichandran of formula (C) at col. 3, line 1 when  $R_5$  is a straight or branched chain alkylene interrupted by oxygen, depicted as  $-O-R_9-O-$ . The compound of formula (C) of Ravichandran also corresponds to applicant's claimed compounds n is 1 and when  $R_5$  is  $R_5$  is a straight or branched chain alky interrupted by oxygen
